Profile

Data Analyst with 6+ years of experience in SQL, Python and Power BI across enterprise data work, ETL, data migration and German work-student roles in sales analytics, ERP automation and BI reporting. M.Sc. Data Science, Universität Trier (thesis completed, graduating 02/2027). Measurable results: cut infrastructure costs by 25% through a Teradata migration, reduced manual effort by 30% by automating ERP workflows, and maintained 95%+ data accuracy. Seeking a full-time Data Analyst role in Germany, open to relocation across Germany and available to join immediately.

Skills

Analytics & BI: Power BI (DAX, Power Query, Data Modeling, Semantic Models), Tableau, Excel (PivotTables, Power Pivot, VBA/Macros), Dashboards & KPI Reporting, Data Visualization, Data Storytelling, Ad-hoc & Management Reporting

SQL & Databases: Advanced SQL (Joins, CTEs, Window Functions, Subqueries, Views, Query Optimization), PostgreSQL, MySQL, Teradata, Google BigQuery, Data Modeling (Star/Snowflake Schema, Fact & Dimension Tables), Data Warehousing

Data Engineering & Quality: ETL/ELT Pipelines (DataStage), Data Integration & Migration, Data Cleaning & Wrangling, Data Profiling, Data Validation & Reconciliation, Data Quality Governance, GDPR

Statistics & Analysis: Exploratory Data Analysis (EDA), Descriptive & Inferential Statistics, Hypothesis Testing, A/B Testing, Regression & Correlation Analysis, Time-Series Forecasting, Trend, Variance & Root Cause Analysis, Customer Segmentation

Programming & Machine Learning: Python (Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn), R, Machine Learning (Regression, Classification, Clustering, Decision Trees, SVM), Model Evaluation, Git/GitHub

Business & Collaboration: Requirements Gathering, Stakeholder Collaboration, KPI Monitoring, Business Performance & Process Improvement, Data-Driven Decision Making, Agile/Scrum, Jira, Confluence, Linux, MS Office

Languages: English (C2) | German (A2; B1 course in progress) | Hindi (native)

Professional Experience

Data Analyst (Working Student) | Biebelhausener Mühle, Trier, Germany | 07/2025 – Present

- Validate and reconcile daily sales and transaction data (approx. 2,000 records/day) in SQL, ensuring accuracy and integrity for operational reporting.
- Analyze customer purchasing patterns and sales trends (trend analysis, EDA) to support inventory planning and improve product availability.

Data Analyst (Working Student) | Thull Technical Services, Trier, Germany | 09/2023 – 02/2024

- Developed Python scripts to automate ERP data extraction and integration workflows, reducing manual effort by 30%.
- Automated order generation processes, cutting response times by 25%.

Data Analyst (Working Student) | Randstad, Trier, Germany | 10/2022 – 06/2023

- Built Power BI reports (DAX, Power Query, data modeling) with KPI views that turned business data into insights for decision-making and planning, improving team productivity by 5%.

- Ran systematic data quality checks, validation and profiling on reporting data, maintaining 95%+ accuracy.

Senior Data Technology Consultant | Virtusa Polaris (Client: RBS), Gurgaon, India | 02/2020 – 10/2021

- Extracted and validated enterprise data using SQL, ensuring accuracy and completeness in retrieval and storage.
- Verified and reconciled daily data ingestion into the Digital Reasoning system to maintain data integrity.
- Tracked releases in Jira and coordinated with offshore teams (stakeholder collaboration) across project activities in an Agile/Scrum setup.

Senior Analyst | Temenos India, Bangalore, India | 06/2019 – 12/2019

- Analyzed customer incidents and performed root cause analysis to support timely resolution.
- Developed and maintained SQL scripts for data retrieval and analysis; documented processes to standardize procedures.

Senior Application Development Analyst | Accenture Services, Bangalore, India | 07/2015 – 06/2019

- Migrated a legacy data system to Teradata, cutting infrastructure costs by 25% and improving scalability for data warehousing and analysis.
- Optimized ETL jobs (DataStage), improving data processing speed by 20%.
- Automated data extraction with Excel VBA macros, saving 10% of processing time.

Education

M.Sc. Data Science | **Universität Trier, Germany** | **10/2022 – 02/2027** (expected)

Master's thesis (completed 06/2026)

Topic: Bayesian CVaR-Driven Weekly Asset (Re-)Allocation with Transaction Costs

110 of 120 credits (ECTS) completed; last module (10 ECTS) in 02/2027

B.Tech. Electronics and Communication Engineering | **GCET, Punjab, India** | **08/2008 – 04/2012**

Projects

Master's Thesis: Bayesian CVaR-Driven Weekly Asset (Re-)Allocation with Transaction Costs **| Universität Trier | 12/2025 – 06/2026**

- Built a Python prototype that forecasts weekly returns for DAX and NASDAQ (converted to EUR) from Yahoo Finance data, using a Bayesian neural network with MC-dropout.
- Optimized portfolio weights by maximizing expected return penalized by tail risk (CVaR) and transaction costs.
- Tools: Python, Bayesian neural network (MC-dropout), time-series forecasting, CVaR optimization

Interactive Power BI Dashboard

- Built a Power BI data model with 16+ tables; prepared data in Excel and created DAX calculated fields and measures. Tools: Power BI, DAX, Excel.

COVID Data Analysis (SQL)

- Used advanced SQL JOINs and views to analyze relational data; transformed, filtered and aggregated data to support reporting and reduce response time.
- Identified key trends and relationships in changing metrics using SQL.

Fraud Detection with Self-Organizing Maps (Research Case Study)

- Pre-processed data in Python and built an unsupervised machine learning model with MiniSom to identify potentially fraudulent transactions.
- Applied K-means clustering to refine fraud detection and improve accuracy.

Certifications

- Microsoft Power BI Desktop for Business Intelligence
- Python – Introduction to Data Science and Machine Learning
- Virtual job simulations: Quantium (Data Analytics), Accenture North America (Data Analytics and Visualization), Tata Group (Data Visualisation)
