Profile

Data Analyst with an M.Sc. in Data Science from Universität Trier, Germany and 6+ years of experience in data analytics, business intelligence, and ETL, specializing in SQL, Python, Power BI, and data visualization. Experienced in data analysis, data quality, ETL automation, dashboard development, and translating data into actionable business insights.

Skills

Data Analysis & Business Intelligence

SQL, Power BI (DAX, Data Modeling), Excel (Advanced, Macros, PivotTables), Tableau, A/B Testing

Programming & Data Analysis

Python, R, Pandas, NumPy, Matplotlib, Seaborn

Databases & ETL

PostgreSQL, MySQL, Teradata, DataStage, ETL Pipelines

Machine Learning

Regression, Classification, Decision Trees, SVM

Software Tools & Platforms

Jira, Git, Confluence, MS Office Suite, Linux

Soft Skills

Communication, Stakeholder Management, Analytical Thinking, Problem Solving, Time Management

Languages

English C2 | German A2 (Actively Improving) | Hindi (Native)

Professional Experience

Data Analyst Work Student

07/2025 – Present | Trier, Deutschland

Biebelhausener Mühle seit 1647 GmbH

- Managed and maintained daily sales and transaction data, ensuring data accuracy and integrity for operational reporting and analysis.
- Analyzed customer purchasing patterns to support inventory planning and improve product availability.

Development Analyst (Work Student)

09/2023 – 02/2024 | Trier, Deutschland

Thull Technical Services

- Developed Python scripts to automate ERP data workflows, reducing manual effort by 30%.
- Automated order generation processes, reducing response times by 25%.

Data Analyst Associate (Work Student)

10/2022 – 06/2023 | Trier, Deutschland

Randstad

- Communicated data insights through Power BI reports to support business decision-making and planning.
- Ensured 85%+ data accuracy through rigorous quality checks.
- Conducted data analysis using **Power BI**, resulting in a 5% improvement in team productivity.

Senior Data Technology Consultant

02/2020 – 10/2021 | Gurgaon, India

Virtusa Polaris Client RBS

- Extracted and validated enterprise data, ensuring accuracy and completeness during data retrieval and storage processes.
- Ensured accuracy and integrity of daily data ingestion in the Digital Reasoning system using **SQL**.
- Used Jira for release tracking and coordinated with offshore teams across project activities.

Senior Analyst

06/2019 – 12/2019 | Bangalore, India

Temenos India

- Analyzed customer incidents and investigated underlying issues to support timely resolution.
- Developed and maintained **SQL** scripts to retrieve and manipulate data for analysis purposes.
- Created detailed process and knowledge documentation to support standardized procedures.

Senior Application Development Analyst

07/2015 – 06/2019 | Bangalore, India

Accenture Services

- Optimized ETL jobs, improving processing efficiency and data processing speed by 20%.
- Conducted **data migration** of a legacy data system to the Teradata system, resulting in a 25% reduction in infrastructure costs and improved scalability for data processing and analysis.
- Created automated Excel macros for data extraction, resulting in a 10% time saving.

Education

M.Sc. Data Science

10/2022 – Present | Deutschland

Universität Trier

B.Tech. Electronics and Communication Engineering

08/2008 – 04/2012 | India

GCET Anandpur Sahib, Punjab

Projects

Covid Data Analysis using SQL

08/2022 – 09/2022

- Used advanced SQL JOINS and views to analyze relational data.
- Transformed, filtered, and aggregated data using SQL to support reporting and reduce response time.
- Analyzed changing metrics using SQL to identify key trends and relationships.

Interactive Power BI Dashboard

04/2022 – 04/2022

- Transformed and processed data using **Excel** and **DAX** to support data completeness and validity.
- Created calculated fields and measures using **DAX**.
- Built a Power BI data model containing 16+ tables.

Web Scraping Project

05/2022 – 07/2022

- Utilized **Python [BeautifulSoup]** web scraping library for data extraction from the web.
- Used **Python, Pandas, NumPy, Seaborn, MATLAB**, and **Plotly** for data analysis and preprocessing.
- Handled missing and null values through data standardization and normalization, achieving 85% data completion.

Research Case Study: Fraud Detection using Self-Organizing

10/2021 – 03/2022

Maps

- Gathered and pre-processed data using **Python**.
- Built an unsupervised machine learning model using Python's MiniSom library to identify potentially fraudulent transactions.
- Applied **K-means clustering** to refine fraud detection and improve accuracy.
